RunDry Evaporators™ Put Money in Your Pocket!

TurnKey offers the unique RunDry Technology which allows you to boil off all of the water and leave only oil and/or solids behind. This resulting sludge usually can go into your dumpster.

The competition can evaporate approximately 90% of your wastewater. This leaves you with 10% to drum off and pay a waste-hauler to take away and dispose of properly.

The operating cost of 10 gallon per hour gas

RunDry Evaporator™ Verses the Competition:

- 8 hours per day of operation → Save \$3,120/year*
- 16 hours per day of operation → Save \$6,240/year*
- 24 hours per day of operation → Save \$9,360/year*

* Based on operating 5 days/week and a national average hauling cost of \$1.50/gallon
